ABSTRACT

Vidarikand (*Pueraria tuberosa DC.*), member of the family *Fabaceae*, a perennial, tuberous climber widely distributed in tropical and subtropical regions of India. The large starchy tubers are the principal medicinal part, valued for their sweet taste and cooling effect. It holds a significant place in traditional systems of medicine, especially *Ayurveda*, where it is regarded as a *Rasayana* drug known for its rejuvenating, nourishing, and strengthening properties. Traditionally, *Vidarikand* has been employed in the management of general debility, infertility, lactation insufficiency, respiratory ailments, and urinary disorders. Modern pharmacological studies further highlight its antioxidant, anti-diabetic, cardioprotective and immunomodulatory activities, thereby underscoring its significance in both classical and contemporary therapeutic applications. *Vidarikand* was reviewed in *Brihatrayee* and emerged out as a chief ingredient in various formulations especially indicated for *Vajikarana* and also found to be used as a *Bhawna dravya* or in the form of *Anupana*. Further, different *Ayurvedic* treatise in particular, *Bhaishajyaratnavali*, *Yogratnakara* and others were observed for this purpose.

KEYWORDS: *Vidarikand*, *Pueraria tuberosa DC.*, *Ayurvedic* treatise, *Samhita*, *Vajikarana*.**INTRODUCTION**

Vidarikand (*Pueraria tuberosa DC.*) family *Fabaceae* as per API (Ayurvedic Pharmacopoeia of India). *Vidarikand* is a perennial, woody climber, 10-30 m long with tuberous roots, up to 60 cm long and 30 cm thick, even weighing upto 35 kg, from about 5 or 10 kg in weight. It is found in dry and moist deciduous forest, including Sub-Himalayan tracts of the country, Eastern and Western Ghats and the Eastern and Southern Peninsular India.^[1]

Across *Ayurvedic* classical literatures, *Vidarikand* is consistently described as a rejuvenating and strength-promoting drug. The large starchy tubers are the principal medicinal part, valued for their sweet taste and cooling effect. Various *Ayurvedic* *samhitas* such as *Charaka samhita*, *Sushruta samhita* and *Nighantu* such as *Bhavaprakash Nighantu*, *Raja Nighantu*, *Dhanvantari Nighantu*, etc. have mentioned *Vidarikand* and its *Guna-Karma*, as *Madhura Rasa*, *Snigdha Guna*, *Sheeta Virya* and *Madhura Vipaka*. The *Vedas*—*Rigveda*, *Yajurveda*, *Samaveda*, and *Atharvaveda*, out of these canonical texts, *Rigveda* and *Atharvaveda* have abundant description and indications of plants but unfortunately no explicit reference regarding *Vidarikand*.^[2]

Charaka Samhita highlights *Vidarikand* as enhancing strength and lactation^[3], while *Sushruta Samhita* emphasizes its aphrodisiac and restorative properties.^[4] *Ashtanga Hridaya* recommends for balancing *Vata* and *Pitta* doshas and for urinary and respiratory disorders.^[5] *Nighantu* such as *Bhavaprakash* and *Dhanvantari* further underscore its cooling, nutritive, and aphrodisiac effects.^{[6][7]} Across these texts, the plant is referred to by multiple synonyms—including *Vidari*, *Bhumikushmanda*, *Ikshugandha*, *Payasya* and many more reflecting diverse therapeutic applications and the continuity of its use from classical *Ayurveda* to contemporary medicine.^[8] A detailed review of *Vidarikand* was also done in a number of *Ayurvedic* treatise for multiple formulations in which *Vidarikand* has been included as an ingredient including but not limited to *Marmagutika*, *Satavaryadi Ghrta*, *Asvagandhadhyarista*, *Nityananda Rasa*, *Sarasvatarista*, *Mahavisagarbha Taila*.^[9] *Rasa granthas*, *Kosha granthas* and various *Nighantu* were explored for its wide range of synonyms.

MATERIALS AND METHODS

Vidarikand in Samhita Kala

Charaka Samhita (1000B.C. - 4th Cent.A.D.)

In *Charak Samhita*, the plant *Vidarikand* has been mentioned under *Madhur skandh* and *Kanthyas, Snehopaga Mahakashaya* (*C.Su.4*). It is also mentioned

as a *Shaka varga* (*C.Su.27*). *Acharya Charak* has thoroughly observed *Vidarikand* for its pharmacological properties and mentioned its therapeutic use in various diseases and widely used it in a variety of formulations.^[10]

Sushruta Samhita (1000 B.C. - 6th Cent.A.D)

In *Sushruta samhita*, *Vidarikand* has been described in *Vidari gandhadi gana*, *Valli panchamoola*, *Pitta sanshaman* and *Madhura varga*. Acharya *Sushrut*

mentioned *Vidarikand* in *Kanda varga*. He listed various therapeutic uses of *Vidarikand* and included it as an ingredient in several formulations.^[11]

Vidarikand in Ras-Grantha**Rasaratnasamuccaya**

The text encompasses numerous formulations involving metallic and herbal components. Notably, *Vidarikand*

has been mentioned as an ingredient in several formulations.^[27]

S.NO.	PREPARATION	INDICATIONS	REF. NO.
1.	<i>Chandravaleha</i>	<i>Pittaj roga</i>	<i>Ras. Rat. Sa. 21/274</i>
2.	<i>Amritprash churna</i>	<i>Pittaj vikar</i>	<i>Ras. Rat. Sa. 21/177</i>

Vidarikand in Kosha-Grantha**Amar Kosha (5th Century A.D.)**

Vidarikand is mentioned in *Dwitya Kand* in *Vanaushadhi Varga* in verse 110 in *Amar Kosha*. Here four synonyms of *Vidarikand* are mentioned as *Vidari*, *Ksheershukla*, *Ikshugandha*, *Koshtri*.^[28]

Bhumikushmanda, *Shukla*, *Ikshuganda*, *Koshtri*, *Vidarika*, *Swadukanda*, *Sita*, *Shringalika*, *Vrishyakanda*, *Vidaali*, *Vrishyavallika*, *Bhukushmandi*, *Swadulata*, *Gajeshta* and *Vaarivallabha*.^[29]

Shabdakalpadruma (20th Century A.D.)

The *Shabdakalpadruma Kosha* was written by Raja Radhakant Dev in 20th century. The *Kosha* describes various synonyms of *Vidarikand* such as

Bedi-Vanaspati-Kosha

The author Prof. Ramesh well described *Vidarikand* featured as *Vidalika*, *Vidali*, *Vidarika*, *Vidari*, *Vidarikand*, *Bilaikand*, *Bhuikohada* and *Bhumikushmanda*.^[30]

1.	<i>Dhanvantari Nighantu</i> ^[31]	<i>Madhur</i>	<i>Guru, Snigdha</i>	<i>Sheet</i>	<i>Madhur</i>	<i>Vaat-Pitta shamak</i>	<i>Balvardhak, Shukra janan</i>
2.	<i>Raj Nighantu</i> ^[32]	<i>Madhur</i>	<i>Guru, Snigdha</i>	<i>Sheet</i>	<i>Madhur</i>	<i>Kapha karak</i>	<i>Rakta-Pitta nashak, Pushti karak, Balya, Veerya vardhak</i>
3.	<i>Bhavprakash Nighantu</i> ^[33]	<i>Madhur</i>	<i>Snigdha, Guru</i>	<i>Sheet</i>	<i>Madhur</i>	<i>Pitta-Vata nashak</i>	<i>Brimhan, Stanya vardhak, Shukra vardhak, Swarya, Mutral, Jeevani, Bal-varnada, Rasayana, Rakta-daha nashak</i>
4.	<i>Kaiyadev Nighantu</i> ^[34]	<i>Madhur</i>	<i>Snighha, Guru</i>	<i>Sheet</i>	<i>Madhur</i>	<i>Pitta-vata-rakta vicar nashak</i>	<i>Brimhan, Shukrajanan, Mutral, Swarya, Stanya-bala-varna prada, Jeevaniya, Rasayani</i>
5.	<i>Madanpal Nighantu</i> ^[35]	<i>Madhur</i>	<i>Snigdha, Guru</i>	-	<i>Madhur</i>	<i>Pitta-rakta-vata nashak</i>	<i>Brimhani, Stanya-shukrada, Rasayani</i>
6.	<i>Sodhala Nighantu</i> ^[36]	<i>Madhur</i>	-	<i>Sheet</i>	<i>Madhur</i>	<i>Vaat har</i>	<i>Balya, Brimhan, Vrshya, Swarya, Atimutral</i>
7.	<i>Priya Nighantu</i> ^[37]	<i>Madhur</i>	<i>Snigdha</i>	<i>Sheet</i>	<i>Madhur</i>	<i>Vaat-Pitta shamak</i>	<i>Vrishya, Rasayana, Brimhan, Balya, Stanya vardhan, Mutral, Daha-jwar-kshaya nashak</i>
8.	<i>Shaligram Nighantu</i> ^[38]	<i>Madhur</i>	<i>Guru</i>	<i>Sheet</i>	<i>Madhur</i>	<i>Pitta hara, Kapha vardhak</i>	<i>Brimhana, Balya, Rasayana, Vrishya, Stanyajanana, Shukrala, Dahashamak</i>

RESULT AND DISCUSSION

The literary review of various Ayurvedic treatises such as *Charaka Samhita*, *Sushruta Samhita*, *Ashtanga Hridaya*, *Ashtanga Sangraha*, *Kashyapa Samhita*, *Harita Samhita*, *Sharangadhara Samhita*, *Bhela Samhita*, *Bhavaprakasha Nighantu*, *Yogratnakara*, and *Bhaishajyaratnavali* reveals that *Vidarikand* has been widely acknowledged for its therapeutic value and potential efficacy. *Charaka Samhita*, classified *Vidarikand* under *Madhura Skandha* and *Snehaopaga Mahakashaya*, with specific applications in conditions like *Rajyakshma*, *Kasa*, *Swasa*, and *Mutrakriccha*. *Sushruta Samhita* highlights it in *Vidarigandhadi gana* and *Pitta Shamana varga*, emphasizing its cooling, rejuvenative, and aphrodisiac properties. Similarly, *Ashtanga Hridaya* and *Ashtanga Sangraha* focused *Vidarikand* in respiratory, urinary, and reproductive disorders, along with *Rasayana karma*. *Bhavaprakasha*, *Yogratnakara*, and *Bhaishajyaratnavali*, described its extensive indication and uses in formulations for *Jwara*, *Prameha*, *Striroga*, *Balroga*, and general debility. The presence of numerous synonyms such as *Vidari*, *Ikshugandha*, *Bhumikushmanda*, and *Payasya* across lexicons like *Amar Kosha* and

Shabdakalpadruma further attests to its widespread recognition and enduring medicinal value existed in ancient times. In present advanced cutting edge era, physicians and researchers should involve and validate the above indications through chemistry lab and pharmacological study about *Vidarikand*.

CONCLUSION

On the basis of classical literatures, it was observed that *Vidarikand* (*Pueraria tuberosa DC.*) is a versatile medicinal plant with multifaceted pharmacological actions and uses. The *samhitas*, *nighantus*, and other compendia underscores its significance as a role of *Rasayana*, aphrodisiac, galactagogue, and nutritive agent highlighting the broad spectrum of therapeutic applications of *Vidarikand* in respiratory disorders, urinary ailments, reproductive and metabolic disorders. In present scenario, *Vidarikand* may play a pivotal role in promoting overall health and vitality. The consistent documentation of *Vidarikand* across centuries demonstrates its relevance in both preventive and curative healthcare practices of Ayurveda.
