ABSTRACT

Introduction: Skin is outermost organ of body which acts as protective mechanism against many microorganisms but due to change in lifestyle, change in food habit, consumption of *Gurugunatmaka Aahara* like cheese, paneer, environmental pollution causes many skin diseases. *Acharya Charak* explain all these eating habits in *Virudha Aahara* e.g. *Desha, Kaala, Matra*.^[1] These kind of *Virudha Aahara* leads to *Agnimandya*, if in this condition food is taken it forms *Apakva Aahara Rasa* called *Aama* which is similar to *Visha*. If it is continue for longer time cause *Dushti* in *Doshas* and *Dhatus* which leads to formation of *Dushivisha*. This *Dushivisha* further cause various diseases.One of such diseases is *Kushtha*. Among *kushtha Dadru kushtha* is the commonest among people. *Dadru* is *kaphapittaja vyadhi*. It can be correlated with Tinea Infections.Symptoms of *Dadru* are *Raaga, Kandu, Mandala, Pidika*.**Case presentation**:- A patient of 42 years old came with complaints of severe itching,circular inflamed lesion over left armpit and abdomen from 6 months. History revealed the survival of patient in unhygienic environment, *Dadhi*, non veg regularly.Patient was also psychologically upset since 3 months. she had used various local and oral allopathic medicines but there was no significant relief. **Management and outcome**:-Eliminating toxin as it is the commonest cause.After 1 month she got significant relief in lesion.There is reduction in itching,size of lesion,inflammation.This case study demonstrates that *Dushivishjanya Dadru Kushtha* can be successfully managed by *Pippalyadi Agad*.

KEYWORDS: Dushivisha, Dadru Kushtha, Kushtha, Pippalyadi Agad (P.A).

INTRODUCTION

In present era, people are exposing to various toxins in day to day life which are causing various health problems. There are many such kind of diseases where treatment does not work, as it is not eliminating the root cause.*Dushivisha* is one of the unique concepts explained in *Ayurveda*. It is a type of toxin which remains inside the body for long-term & then produces various ill effects on the body. *Sthavar, Jangam* or *Kritirima visha* which cannot be eliminated from the body completely but it is destroyed or denatured due to use of anti poisonous remedies in past, fire, air, sun exposure or due to its low potency it does not kill the human instantly. But as it is encapsulated by *Kapha dosha* it remains accumulated in the body for several years producing various ill effects.^[2]

Different factors aggravates this condition, like, Dushta desha (wet lands), Dushta Kaal (cloudy days), Dushta anna, Diwaswapna (day sleep), Pragwat (air from eastern region), Ajirna (Indigestion), Ativyayam (over exertion), Ativyavay (sexual intercourse), Krodha (anger).^[3,4,5]Dushivisha formed in the body causes Rakta Dhatu Dushti. Symptoms of Rakta Dhatu Dushti seen on skin such as Kotha, Kitibha.^[6] In Ayurveda all skin diseases are explain under Kushtha. Kushtha is a Tridoshjanya Vyadhi. Mithya Aahara Vihaara, Snighdha, Guru Anna Sevana, Adhyashana, Shitoshna Aahaara, Divaswapa are the Hetus of Kushtha. All these Hetu cause Shaithilya in Rakta, Mansa, Twacha which forms Kleda in body causing Kushtha.^[7] All Acharya explain many types of Kushtha. Dadru is one of the type of Kushtha. Acharya Charak includes Dadru in Ekkushtha, Acharya Sushrut and Acharya Vaghbhat includes in Mahakushtha.^[8,9,10]

Dadru is Kaphapittaja vyadhi. Symptoms of Dadru are Raaga, Mandala, Deerghpratana, Kandu which are similar to symptoms of Tinea (circular shaped rashes with edges elevated, itching, blister) fungal infection. About 10-20% of general practice includes patients suffering from skin diseases out of which 20% contributes fungal infection. Etiological factors of Dadru Kushtha are Aaharaja, Viharaja, Upsargaj. Acharya Sushrut mentioned Prasanga, Gatrasamsparsha, Vastra, Malyanulepa causes of Kushtha which are similar to causes of tinea. Causes of tinea are touching inanimate objects like combs, personal care products.^[11] In modern science many drugs are available for tinea infection but no any drughave satisfactory result. Acharya Yogratnakar mentioned Pippalyadi Agad in the management of Dushivisha. As the Dushivisha cause is considered here. Along with we have given Nitya Mrudu Virechan in the form of Gandharva Haritaki daily at bed time. Pippalyadi Agad have Kushthaghna, Krimghana, Vishaghna, kandughna properties.

MATERIAL AND METHODS

Centre of study:- SSAM Hadapsar college Skin department. (single case study).

Personal History

 Table 1: Personal history.

CASE STUDY

42 yr female came to skin department of our hospital with chief complaints of severe itching, inflamed, thick lesion over left armpit and abdomen.

Duration:- Since 6 months.

Past history:- No history of any major illness.

History of present illness

The above patient was symptomless before 6 months. But as the symptoms were seen the patient had taken other treatment and he had not got the significant relief. So she came to the skin OPD.

Name-XYZ	Bala- Madhyam	Prakriti- Vata kapha	
Age-42 year	Sleep- Samyaka	BP- 110/80mm of Hg	
Sex- Female	Addiction-None	Weight-52kg	
Mariatal status-Married	Bowel habit- Once a day	Height-153cm	
Occupation- Housewife	Appetite-less		

Table 2: Ashtavidha Pariksha.

Nadi - Vatapittaj	Shabda- Spashta
Mala - Samyaka	Sparsh- Samshitoshna
Mutra - Samyaka	Druka- Spashta
Jivha – Alpa Saam	Akruti- Madhyam

Dushivisha

- A. History of Jangam visha-
- B. History of Sthavar visha-
- C. History of Viruddhaahar-
- D. History of Continuous usage of any medicine-
- E. Aggrevating factors of Dushivisha-
- a. Desh- Anupa
- b. Kal- Varsha rutu
- c. Anna- Dadhi,Non veg

d. Nidra- Diwaswap

Local Examination

- 1. Site of lesion: Abdomen and left armpit
- 2. Distribution: Circular
- 3. Colour: Reddish
- 4. Itching: Severe
- 5. Inflammation: Present
- 6. Discharge: Absent

_	Assessment criteria: ^[12]							
Sr. No.	Parameter	Grade 0	Grade 1	Grade2	Grade3	Grade4	Grade5	
1	Itching	No itching	Ocassionally mild itching	Mild itching	Moderate itching	Severe Itching	Severe continuous Itching	
2	Inflammation	No inflammation	Mild inflammation	Moderate Inflammation	Severeinflammation	Severe inflammationwith prominent erythromatous base	Severeinflammation, erythema	
3	Colour changes	-	Normal skin colour	Faint and near to normal	Blanching and red colour	Red colour	Dark red colour	
4	Nature of lession	No lesion	Mild viable lesion	Moderately visible	Prominent visible lesion	Prominently evident lesion associated with discharge	Prominently visible with Discharge	
5	Size	Below	1-2 cm	2-3	3-4	4-5	Above 5cm	

Assessment parameters of effect of therapy.

Cured	Improvement in all signs and symptoms		
Markedly improved	75% or more improvement in all signs and symptoms		
Moderately improved	50% or more improvement in all signs and symptoms		
Mildly improved	25% or more improvement in all signs and symptoms		
Not cured	25% or more improvement in all signs and symptoms		

Management of case

Nitya mrudu virechan is given

Aushadhi	Matra	Kala	Anupana	
Gandharva Haritaki	250 mg at bed time	Nishakaal	Koshna jala	

Shaman

Aushadhi	Matra	kala	Anupana	
Pippalyadi Agad	3gm	After lunch and dinner	Madhu	

Follow up was taken after 7th,14th,21th,28th day Observations

Observations	Day 0	Day 7	Day 14	Day 21	Day 28	Treatment
Itching	4	4	3	2	0	P.A
Inflammation	3	2	2	1	0	P.A
Nature of Lesion	4	3	3	3	2	P.A
Size of Lesion	4	3	3	3	2	P.A
Colour of Lesion	4	4	3	2	1	P.A

DISCUSSION

In this case study Dushivisha is the root cause. Hetus are Dadhi sevan, non veg regularly, unhygienic environment, Diwaswap, stress. Probable mode of action of Pippalyadi agad:- Pippalyadi Agad includes nine drugs Pippali, Dhanyaka, Jatamansi, Lodhra, Ela, Maricha, Tagara, Sarjika kshara, Suvarn gairika. In all Twak Rogas mostly Raktadushti is the major factor. All the contents in Pippalyadi Agad have Vishaghna, Kusthghna and Raktavikarnasak properties and also some of the drugs in these Agada like Pippali, Jatamansi, Lodhra, Ela, Tagar, are Kushthaghna, Vishaghna, Vranaropana, Sothaghana mostly act on Twakroga. The Deepan, Pachan properties of these drugs acts on Dushivisha treatment. The Kustha manifest by krimi and Pippali, Dhanyaka, Maricha has Krimighna property. Lodhra is the single drug of choice

in skin diseases. The *Kshara* itself having the property to destroy the degenerated *Dhatus* and remove unhealthy tissues and *Doshas* from their location. The goals of treatment are eliminating the toxins and prevent *Kushtha* along with prevention of scar. Modern medications for Skin disorders include topical therapies, antimicrobials, hormones, surgery, UV- radiations, laser treatment etc. But these have many limitations and adverse effects. *Pippalyadi Agad* play a good role in the management of *Dushivishajanya Dadru Kushtha* by the action of neutralize the toxins in body and purifying the blood by its *Vishaghna* property.*Vranaropana* property promotes faster healing of lesions without leaving scars. The drugs having *Kusthaghna, Krimighna, Sothahara, Kandughna* properties. Thus, *Pippalyadi Agad* is beneficial for

Dushivishajanya Dadru Kushtha by its action and properties.

CONCLUSION

Pippalyadi Agad proved effective in the treatment of *Dadru Kushtha* as the causative factor was *Dushivisha*. *Shodhan* helped to remove the toxins from the body. The remaining toxin were neutralized by *Pippalyadi Agad*.
